SUMMARY

Motivated Computer Science Undergraduate With hands on Experience in Java Full stack Developer and Strong problem solving Skills. Building intelligent solutions with AI and experienced with real time communication, deployment workflows and modern tools including Socket.IO, Redux Toolkit ,Docker, Redis, AWS, CI/CD, vercel .

WORK EXPERIENCE

Full Stack Developer Intern — Small Fare (Remote)

June 2026 - Aug 2026

- Built an interactive canvas-based seat layout designer letting organizers draw custom seating sections, stages, and shapes, then assign per-seat pricing and enable bookings.
- Engineered a 6-step event creation and publishing wizard in Next.js covering venue, pricing, and media, fully wired to Node.js/PostgreSQL REST APIs.
- Fixed a critical foreign-key constraint bug blocking event deletion and added optimized SQL joins for real-time ticket-sales tracking.
- Built a custom event URL (slug) system with uniqueness validation and post-publish locking to prevent organizers from breaking live public event links.
- Collaborated closely with a cross-functional development team, quickly picking up unfamiliar tools and technologies as needed and consistently delivering assigned features within given deadlines.

Aug 2026 - Sep 2026

Java Development Intern - Cognifyz IT (Remote)

As a Java Development Intern, I will have the opportunity to work on various projects and tasks, develop a robust and scalable applications, and contribute to the design and implementation of software solutions.

EDUCATION

B.Tech in Computer Science, IIMT University

2022 - 2026

CGPA: 7.5/10

Class XII(Senior Secondary) - CBSE

2022

Percentage - 76.7%

Class X (Secondary) - CBSE

2020

Percentage - 81%

PROJECTS

Earnity | AI-Enhanced Student Earning & Career Platform

[Live link](#)

- Earnity | AI-Enhanced Student Earning & Career Platform Github Engineered a multifaceted platform in Java, combining a verified task marketplace (ads, surveys, microtasks) with end-to-end task tracking to ensure transparency and drive student income.
- Built a secure digital wallet infrastructure utilizing Firebase for real-time data fetching and storage, incorporating points accumulation, redemption logic, and transaction history Implemented AI-powered career enablement tools, featuring a dynamic resume builder, personalized job alerts, and targeted recommendations for internships and scholarships.
- Architected a scalable backend to manage the dual ecosystem of a peer marketplace and campus recruitment tools, focusing on driving continuous student professional growth

DevCollab - Real-Time Collaborative Coding with AI

[Live link](#)

- Architected a real-time collaborative coding platform for multi-user code editing, live chat, and file-tree sync — on a layered MVC + Service-Layer backend (Node.js, Express, MongoDB) with JWT auth, Redis-backed sessions, and Socket.io.
- Developed an AI pair-programming assistant that turns plain-English prompts into complete, multi-file apps using the Groq LLM API (Llama 3.3-70B), packaged into a downloadable, ready-to-run project archive.
- Engineered a production-grade React frontend using Context API for state management, Axios interceptors for authentication, and protected routing, deployed with Docker and Nginx, backed by TLS-secured Redis (Upstash).

SKILLS

- Programming Languages:** JAVA,JavaScript,HTML,CSS
- Frontend:** React, Tailwind CSS, Redux Toolkit
- Backend:** Node.js, Express.js, Socket.io, Redis
- Cloud/DevOps & Tools:** Git, GitHub, Vs Code, AWS, Docker, CI/CD ,Vercel and Cloudinary
- Database:** MongoDB, PostgreSQL

CERTIFICATIONS

- Soft Skill Development Certification:** Successfully completed comprehensive coursework via NPTEL, IIT Kharagpur (Jan-Mar 2026).
- Introduction to Internet of Things Certification:** Successfully completed comprehensive coursework via NPTEL, IIT Kharagpur (Jan - Apr 2026).
- Social Networks:** Successfully completed comprehensive coursework via NPTEL, IIT Madras 2026
